TM22

The TM22 is a .22LR classified as a hunting rifle. However, due to the fact that this caliber is one of the most popular calibers around the world, and the TM22 is a full aluminum or polymer (Feather version), reliable, and accurate rifle, it also allows for use in different fields such as training, practicing, and fun.

Of course, one of the main reasons for choosing this Semi-Automatic Rimfire are reduces recoil, the silence and the excitement during shooting. Our TM22 model, which offers various magazine options, is striking for its lightness, durability and accuracy when shooting. Thanks to the standard-compliant picatinny rail on the top you can easily mount various red-dot sights and scopes to achieve precise shooting.

With compatibility for an AR-type grip, a commercial buffer tube adapter, a top rail, and a forend that accepts most aftermarket accessories, this rifle is designed for users of all ages and a wide range of scenarios. This 18″ barrel 34″ Overall length .22LR rifle was built with no compromises and comes with two 10rd polymer magazines. Aftermarket factory 15rd and 25rd magazines are available.

TM22 Feather

The TM22 Feather is an innovation in rifles, offering a feather-light and versatile shooting experience. Crafted with precision, this rifle features a polymer forend, receiver, stock, and magazine, all contributing to its exceptional lightweight design, making it comfortable and effortless to shoot.

Unlike its aluminium counterpart, the TM22 Feather comes with an AR-type stock, enhancing control and adaptability during shooting. The ergonomic design complements the rifle's aesthetics. At its core lies a durable polymer receiver, a testament to modern engineering. This receiver not only reduces weight but also makes it suitable for shooters of all levels.

Retaining the essence of the versatile .22 LR caliber, the TM22 Feather caters to hunters, trainers, and recreational shooters. Experience reduced recoil, silence, and excitement with the TM22 Feather. It offers impeccable accuracy, multiple magazine options, and a picatinny rail for accessories.

This .22 LR rifle features a substantial 18″ barrel, an overall length of 34″, and comes with two 10rd polymer magazines. Additional 15rd and 25rd magazines are available.

TM22 Standard

TM22 Standard is one of the latest additions to Derya Arms' innovative TM22 ecosystem. Designed for .22LR ammunition, this model offers a lighter, more practical, and user-friendly shooting experience. Its compact and integrated design ensures easy handling and broad compatibility with various accessories.

All signature features of the TM22 family are preserved in this model. It is compatible with polymer magazines of 10, 15, and 20 rounds, allowing users to use the same magazines across all TM22 rifles. The threaded muzzle enables attachment of compatible accessories such as suppressors or compensators. Thanks to its adjustable cheek riser, shooters can professionally align their sight picture when using scopes or red dots. Additionally, the 2 cm buttstock extension spacers allow customization of stock length for a perfect ergonomic fit. By removing the included extension piece, the rifle becomes ideal for younger or smaller shooters as well.

A 22 mm concealed rail under the handguard provides easy installation of bipods, enhancing stability for precise shooting.

With its lightweight and compact build, it's the perfect companion for outdoor shooting and field use. Moreover, special color options are available for female and young shooting enthusiasts.

With the TM22 Standard, you'll be the center of attention at the range!

TM22 LA

The TM22 LA-18 is ready and waiting to be your next TM22 Rifle. The combination of our Ruby Rise and TM22 brought this unique model to the range. It has an aluminium receiver and magazine, which allows a reliable and accurate rifle and it can be used in different fields such as training, practicing and hunting.

Have you ever seen a detachable magazine fed .22LR Lever Action? No? Then it is time for you to test this matchless Rimfire and enter the brand new world of Lever Actions. Thanks to the standard-compliant picatinny rail on the top you can easily mount all types of red dots and scopes to make perfect shoots.

You can also adjust the length and the cheek pad on the AG Stock. Of course, one of the main reasons for choosing this Lever Action Rimfire is the reduced recoil, the silence and the excitement during shooting. Our TM22 LA-18 model, which has various magazine options, is striking for its lightness, durability and accuracy when shooting. This 18" barrel 36" overall length .22LR rifle was built with no shortcuts, comes with two 10rd polymer magazines. Aftermarket factory 15rd and 25rd magazines are available.

ZY9

Unconventional design, unmatched performance, and familiar AR handling. Derya offers you a selection of complete 9mm carbine rifles and pistols for your next training day on the range or competition. Choose from a variety of stock options, barrel lengths, furniture configurations, and more to find the right gun for you.

The ZY9 is the first pistol from the house Derya and offers many features like stock options, AR9 trigger, picatinny rail, M-Lok forend and ½ x 28 UNEF thread on the barrel. It's precise, super precise. You can suppress it well, it fits in a compact package and 9mm is available just about anywhere.
This pistol is chambered in 9mm with a 5.9" button rifled barrel supported by a full-length M-Lok forend. Besides, various barrel lengths are available.

Looking for something a little more refined and perhaps with a last round bolt hold open? It's definitely enhanced with the LRBHO as well as some small niceties that make building and using it an upgrade. The ZY9 is a closed bolt, blowback operated system driven by our 9mm bolt carrier group and feed with standard GLOCK® 9mm magazines.
When we were designing the ZY9, our goals were reliability, affordability, and familiar controls for the user. The ZY9 redefines the submachine gun category with a new level of dual system.
